Kompa Leon goes Green!

Dear valued customer,

At Maduro & Curiel's Bank N.V., we continue to look for ways to bring environmentally friendly products to our customers. For this reason we have taken the first step by making our Kompa Leon cards, Curacao's first eco-friendly credit cards.

We are very pleased to announce that all our new Kompa Leon Cards are made from recycled plastics, using the Earthworks process, which transforms old returned cards into reusable sheet material ready for making new cards. When your current Kompa Leon card is due to expire, you will be issued a new Kompa Leon card made of this recycled plastic. Our plans for the future are to expand our line of products produced, using recycled materials and also begin introducing improvements in technology, which will ultimately make our products and services less reliant on paper and friendlier to our environment.

Please visit www.mcb-bank.com/green where you will find useful tips and videos on how you can contribute to improve our environment.

Yours truly
